Viticulture

Touriga Nacional, the main grape variety of our vine-stock selection and Tinta Roriz, which adds complexity, elegance and structure to the wine, growing on slopes at an altitude of 350-400 meters.

The vine is grown within a program of integrated protection; the use of herbicides is forbidden. Infestation control is carried out through soil movement. Grape-picking is done by hand, caste by caste, when the ideal point of ripeness is reached, normally between the second fortnight of September and the first fortnight of October. The harvest is collected in small 10 kg boxes.
